- Dynamic Testing: Black Box Testing, White box testing, Grey box testing
- Functional Testing: GUI Testing, Boundary Value Analysis, Equivalence Class Partition, Error guessing, Negative testing, Back End testing, Database Testing, Compatibility Testing, Security testing, Portability testing, Configuration Testing, Recovery testing.
- Other good to know testing: Unit Testing, Integration Testing, Regression Testing, Sanity Testing, System Testing, Acceptance Testing, Non-Functional Testing, Compatibility Testing, Data Flow/Control Testing.
- Test cases and use case design
- Test Case Parameters
- Advantages of Test Data Gathering
- Managing Test data and creating Data Repositories
- What is a Bug?
- Difference between Bug and Defect
- Learn Test Execution Life Cycle Process
- Understand Different levels of Test Execution
- Sanity/ Smoke Testing
- Test Batches or Test Suite Preparation and Execution
- Retesting
- Regression Testing, What is Bug Leakage
- Test Design

- What is a Test Plan?
- Entry and Exit criteria
- Test Coverage
- Test Responsibilities
- General risks in test environment

Session3: MANUAL TESTING

- Unit Testing
- Integration Testing
- System Testing
- Acceptance Testing
- Black Box Testing
- White Box Testing
- Grey Box Testing
- Manual Software Testing Process
- Advantages of manual testing
- Did advantages of manual testing

Session 4: Automation Testing – Introduction to Automation Testing

- What is Automation testing
- Benefits of Automation Testing
- Various Automation Test Tools
- Tool selection criteria
- Introduction to Selenium

- Fundamentals of Selenium, overview, presentation, export features, installation, Selenium IDE and web driver.
- Test application with Selenium IDE, RC VS web driver, how to create test drive with web drive.
- 18.
- Requirements Module
- Creating different types of Requirements
- Creating traceability between requirements and Tests
- Importing Requirements,
- Requirements Graphs and Reports
- Test Plan Module,
- How to create Manual Test Cases
- Creating Parameters
- Importing Test cases
- How to create Test Sets,
- .Linking Test cases to Test Sets
- Executing Test Cases

Session 5: Bug Reporting & Web Services Testing

- What is Bug Reporting?
- Most popular Test Reporting Tools
- Service Oriented Architecture (SOA), who uses SOA
- WebServices, Why Web Services are Being Used? What is WSDL? , Web Service Standards, tools to test Web services, how to test web services, why to test web services.

Session 6: Mobile App Testing

- Mobile Applications and Mobile Application Testing.
- Differences between Mobile and Mobile application testing
- Differences between Native, Hybrid and Mobile Web application.
- Complexity of mobile testing domain
- Network related applications and Other applications
- Recommended strategy for mobile application testing
- Types of Mobiles; Android, iOS, Windows7
- Mobile testing and Mobile application testing strategy, How to choose which devices to test, planning what to test and how to review strategy
- Unique challenges in mobile application testing
- Simulators and Emulators, how to configure emulator

Session 7: Database Testing

- Database Table, Column Testing
- Keys and indexes testing
- Stored Procedures Testing
- Trigger Testing
- Database Server Validations
- Functional Database Testing
- Checking data integrity and consistency

- Login and User Security
- Non-functional testing
- Load Testing
- What is Database Stress Testing?

Session 8: Game Testing

- Functional Testing
- Compatibility Testing
- Performance Testing
- Conformance /Compliance Testing
- Localization testing
- Soak testing
- Recovery testing
- Security testing
- Other Games testing
- Sound Testing
- Database and game statistics
